

Boy Scouts of America – Lone Bear Council Ring

The Heart of America Council expanded their council ring in order to accommodate the growing number of participants. In doing so, Harvest addressed the need for additional sound reinforcement and upgraded the lighting to become one of the best audio-visual systems of any Boy Scout camp in the country. Lighting has been specially designed to reduce light pollution at night, minimizing the impact on the local environment.

Systems Integration

This system incorporated the following:

- Tomcat Truss
- Electronic Theatre Controls:
 Lighting Fixtures, Dimming and Control
- Sennheiser Microphones
- Martin Lighting
- JBL Professional Speakers

Challenges

- Extreme weather conditions (Heat, Rain)
- Light pollution, environmental requirements
- Electrical considerations
- Maintenance and upkeep must be minimal
- Multiple new users every year, impractical to provide ongoing training for every new user of the system.

Harvest Productions is a Sound, Lighting, Video, Networking and Acoustics integration company located in Kansas City, Missouri. In addition to System's integration Harvest is also a full production company with the capabilities to meet the needs of almost any audio visual project with quality equipment and resources.
