

# Kansas City Power and Light District

Located in the heart of Kansas City and across from the new Sprint Center where Harvest also installed the audio system, the KC Live Stage is one of the best examples of a Harvest Productions project. This project incorporates all the aspects of what Harvest has to offer.

## *Systems Integration*

Harvest worked in conjunction with the Cordish Company to Install the Sound, Lighting, Video, and Network for the entertainment you see on the KC Live Stage. Harvest incorporated quality equipment including:

- Tomcat Truss
- Turbo Sound Speakers
- Crown Amplifiers
- Media Matrix Processing
- Sennheiser Microphones
- ETC Dimming
- Martin MAC entertainment lighting

## *Production and Event Services*

In addition to the initial installation, Harvest provides additional support by managing and providing the equipment used for the weekly concerts at the KC Live Stage.

Services Include:

- Sound Reinforcement
- Lighting Design and Control
- Camera Operation and Production
- Production Operators
- Equipment Rental and Creative Design Services

Harvest Productions is a Sound, Lighting, Video, Networking and Acoustics integration company located in Kansas City, Missouri. In addition to System's integration Harvest is also a full production company with the capabilities to meet the needs of almost any audio visual project with quality equipment and resources.
